Marist College Update

Marist College has completed their implementation and is live with the CNY catalog! Congratulations to all the staff at Marist who worked diligently to complete this project prior to the start of the Fall semester.

Please be advised that Marist students in online degree programs may not have a physical student ID to present when visiting another CNY institution. These patrons will be able to provide their CWID, which is the configured match-point, and a form of photo identification. Questions or concerns about CNY visiting patron policy can be addressed to Sarah Probst.

Some institutions may experience errors when scanning Marist's item barcodes. Please be advised that we are working with Innovative Interfaces to remedy this issue and will provide an update on the situation as soon as possible. If entering Marist barcodes manually, add a leading 0 (total of 5 beginning zeros) and drop the last digit. Institutions experiencing these issues should email sprobst@connectny.org.

Thank you to everyone who submitted an application to serve on a Committee this year! CNY is a stronger organization because of your engagement.

CNY Communities of Interest

CNY has 3 established communities of interest (COIs): Access Services, Discovery Layers, and Marketing Resources and Strategies. These communities were developed out of needs brought to the attention of the CNY Office by members’ staff.

COIs are open to all staff and are a great way to get feedback and help from your colleagues! Email sprobst@connectny.org to be added to a community or to start a new one!

CARLI Receives Laura Bush 21st Century Librarian Program Grant

The Consortium of Academic and Research Libraries in Illinois (CARLI) has been selected as a recipient of an IMLS, Laura Bush 21st Century Librarian Program grant to fund “CARLI Counts: Analytics and Advocacy for Service Development.” CARLI Counts is a continuing education library leadership immersion program aimed at preparing librarians to make effective use of research findings on the impact of academic libraries on student success. Participants in the program will learn how to use local library data in alignment with institutional data, goals, and strategic priorities to improve their services and demonstrate their value.

Deliverables from this project will include a portfolio of local case studies and a replicable state/regional training model for equipping librarians to be campus leaders. All project deliverables will be freely available on the CARLI website. For more information about the project visit https://www.carli.illinois.edu
